## Professional Aquatic Weed Control Services

Dear Daniel Tyrolt & Round Lake Homeowners Association,

6-17-2010

Thank you for choosing Northern Aquatic Services to assist you in your battle with Eurasian Watermilfoil. I look forward to working with you, Kristy Maki of Sawyer County, and the WDNR in a combined effort to reduce the population of EWM growing in Round Lake.

### Costs

Treatment of 13.4 acres with 200 lbs. of granular 2-4D per acre \$ 11,524  
(13.4 Acres x 200 lb/acre x \$4.30 per lb)

---

***Total Cost*** **\$ 11,524**

By using the formula above you can figure out the cost of your treatment. I would advise that it is common practice (recommended by the WDNR) to treat a buffer of 30 feet around a known EWM bed. So for example: a known bed of 208' x 208' = 1 acre, if you add 30 foot perimeter that becomes 238' x 238' + 1.3 acres. This is increasingly important on smaller and exposed spots where dilution effects become greater.

There is a 2-acre per lake minimum to cover my costs.

**Terms-** Upon completion of each activity Northern Aquatic Services will invoice the Round Lake Homeowners Assn. in care of Daniel Tyrolt. All monies are due within 14 day of invoicing. All agreements are contingent upon receiving the proper permit from the WDNR. Prior to the treatment, the Round Lake Homeowners Assn. is responsible for distributing copies of the enclosed **Treatment Notice Letter** to all riparian property owners within 150 feet of the proposed treatment area.

*I agree to the costs and terms of this agreement*
