

Hello Tom

Tom is correct. I omitted crossing out the Max G for the Round Lake Permit (clerical error). I did cross it out on the copy that was sent to Tom. Tom and I talked about this before I issued the permit. Max G was used prior to this year as a Field Trial Use permit. It would have still had to be used under that designation. This would involve extensive monitoring and analysis. Tom and I then decided the most standard and economical route would be to use an approved 2,4-D product such as DMA-4 or Navigate. So it is understood that either Navigate or DMA-4 may be used on Round Lake and Little Round Lake and no herbicide concentration monitoring is required.

**Subject:** Round & Little Round Sawyer County Milfoil AIS permits

Hello Mark:

I'm the Treasurer and Milfoil Coordinator for Round Lake Property Owners Association.

Thank you for sending the approved permits to us.

On The Round Lake permit NO-2013-58-816 the proposed and approved chemicals are Renovate Max G DMA 4 IVM (liquid 24 D)

On The Little Round permit NO-2013-58-817 the proposed chemicals are the same but Renovate Max G is crossed out and apparently not approved on Little Round only.

After talking with Tom Connell he implies that Renovate Max G was also not approved on Round Lake although the approved permit does not reflect this. Mr. Connell also stated that Max G was going to be replaced with "Navigate" on both lakes although this is not on either permit.

Can you please clarify this issue for our association? Can Max G be used on Round Lake or was there just a clerical error? Is Navigate OK even though not on either permit?

I also do the website for Round Lake Property Owners Association  
[www.roundthelake.com](http://www.roundthelake.com)

Can treatment notification be put on our website as alternative to letters? We also have several hundred email addresses and could send notification by email. What needs to be put in the notification to affected homeowners?  
Can we hand deliver (put inside their front door or tape to their front door) the notifications to each affected property owner if electronic notification not acceptable?

Thank you in advance,
