

34 Pounds of Pleasure

by Alan Reinemann Chairman, Fish Committee

On October 23, one of my guests, David Ewald of Wonderlake Illinois, caught a 34 pound, 46.5" musky. After 14 years of fishing here, someone finally caught a fish over 30 pounds. David went out at 6:30 am and the fish hit around 8 am. After David set the hook and lost his bait, the fish came back and nailed his second line. These big fish really put on the feed bag this time of year. The fish was caught in 40 feet of water, near one of the deeper spots on the lake. After cutting the hooks out of the jaw, the fish swam off to hopefully be enjoyed by a few more lucky anglers.

Nine New Cribs Added

We continue to add new fish cribs to our Round Lake habitat. In 2004 we added nine additional cribs to our original count of 31. This map indicates approximate locations of all our cribs.
