

Teamwork in Round Lake dredging project

Editor:

Regarding the article titled "Round Lake Narrows dredged to improve navigation" in the Sept. 1 issue of the Record, Round Lake Marina initiated the responsibility for obtaining the permits from the DNR and hired Jim Miller and his team to do the work. DJ's Dock decided to move forward and dredge their bay, too.

It sounds like the Round Lake Property Owners Association will pitch in \$1,000 and we thank them, too.

A volunteer from Little Round Lake, Bill Parks, helped dig under the bridge the first day. We certainly appreciated his help and enthusiasm. People employed by Round Lake Marina and Famous Dave's did the rest of the work and were paid to do it. We'd like to thank our employees, Famous Dave's employees (and Dave) and Jim Miller Excavating's team. They all worked hard and did an excellent job.

We hope homeowners on both Little Round and Round Lakes enjoy having the opportunity to go between the lakes now.
